

COVER PHOTOGRAPH

*Completed marble & glass mosaic, shot at a raking angle
so the gold leaf and the cut lines catch the light*

PORTRAIT OR SQUARE CROP · MIN 3000 PX ON THE LONG EDGE

Bespoke Mosaic *in Marble & Glass*

A commission studio for architects, designers and developers —
where a drawing, a photograph or a single colour reference
becomes hand-cut stone and hand-poured glass, made to the exact
dimensions of your space.

TRADE & SPECIFICATION PORTFOLIO · CUSTOMISATION, MATERIALS, TECHNICAL DATA

Our atelier has expanded — and with it, what we can make for you.

Three capabilities are now open to trade partners, and every one of them exists for a single reason: to remove the limits on what a client can ask for.

For years the constraint in mosaic work has not been skill — it has been scale, palette and time. A design had to be simplified to fit the stock, the panel sizes had to suit the workshop rather than the wall, and a bespoke colour meant a season of waiting.

We have rebuilt the studio around the opposite premise. The design desk, the stone saws, the glass and the fitting team now sit inside one process, so a commission moves from reference image to installed surface without ever being handed to a third party — and without being edited down to what was convenient to produce.

*The question is no longer what we can supply.
It is what you would like made.*

I

Marble and glass, fused in one composition

Hand-cut stone and hand-poured glass, including 24k gold-leaf tesserae, set in the same artwork — stone for depth and vein, glass for light and saturation.

II

Customisation without a catalogue

No fixed range to choose from. You supply artwork, a mood, a material sample or a photograph; we return a cutting drawing and a physical colour lay-up for approval.

III

Made to the millimetre of your drawing

Panels are set out to your site dimensions, numbered, and delivered with an installation key — so what leaves the atelier fits the wall it was measured for.

Everything is decided by hand,
then held to a drawing.

ATELIER PHOTOGRAPH

STONE

Blocks are selected for vein direction before a single cut is made, so a figure runs through the finished composition rather than across it. Tesserae are split and dressed by hand — the edge you see is a cut edge, not a moulded one.

GLASS

Hand-poured glass carries colour through its full body, so a chipped or cut face reveals the same tone. Gold and white-gold leaf are laid between glass layers, which is why the metal keeps its lustre in wet areas.

SETTING

The flow of the setting lines — the *andamento* — is drawn before assembly. It is the difference between a picture made of tiles and a mosaic that moves with the light in the room.

If it can be drawn, photographed or described, it can be cut.

Customisation here is not a choice between options. It is the whole method: every commission begins as a blank sheet and your reference, and ends as a numbered set of panels that exist nowhere else.

SIX VARIABLES, OPEN ON EVERY COMMISSION

Subject A figurative scene, a house monogram, a repeating geometric, a stone-on-stone pattern, or an abstract field of colour.	Palette Matched to a fabric, a paint reference, a metal finish or an existing stone already on site.	Tessera scale Fine cutting for portraiture and detail; larger tesserae where the piece is read from across a room.
Finish Polished, honed, brushed or tumbled stone, set against gloss, satin or iridescent glass.	Format Floor medallion, full wall, splashback, stair riser, pool or hammam lining, table top, framed panel.	Edge & border Cut to an irregular outline, framed in a contrasting stone band, or bordered in metal trim.

What you specify, and what we decide together.

Every line below is open on every commission. Where a project brief is silent, the atelier proposes — and nothing is cut before the drawing and the physical lay-up are signed off.

VARIABLE	AVAILABLE RANGE	DECIDED BY
Design origin	Client artwork, photograph, fabric or wallpaper reference, historical pattern, architect's drawing, or an original design developed in the studio	Client / studio
Composition style	Figurative, portrait, botanical, geometric, arabesque, <i>opus</i> patterns, gradient field, plain stone-on-stone	Client / studio
Materials	Natural marble, onyx, travertine and granite; engineered quartz; hand-poured glass; 24k gold, white-gold and copper leaf glass; mirror glass; mother-of-pearl inserts	Client
Tessera size	Micro-cut from 5 mm, standard 10 / 15 / 20 mm, large-format above 20 mm, and free-form hand-cut shapes within one piece	Studio, to viewing distance
Cut style	Hand-nipped irregular, precision water-jet, or the two combined — water-jet for the outline, hand-cut for the field	Studio
Surface finish	Polished, honed, brushed, tumbled, sand-blasted; gloss, satin or iridescent glass	Client
Grout	Colour-matched or deliberately contrasting; epoxy for wet and submerged areas	Client / studio
Format & size	Cut to your dimensions — medallions, borders, full walls, floors, stair risers, pool and hammam linings, table tops, framed panels	Client's drawing
Backing & delivery	Mesh backing as standard on every sheet and panel, numbered to the installation key	Standard
Edge treatment	Straight cut, irregular outline, contrasting stone border, or metal trim	Client

APPROVAL SET

What you receive before production

- ◇ Scaled colour visual of the design in situ
- ◇ Cutting drawing with panel divisions and setting-out lines
- ◇ Physical material lay-up of the exact stones and glass

STUDIO PHOTOGRAPH

*A material lay-up or sample board —
stone and glass arranged for approval*

Marble, natural stone & quartz

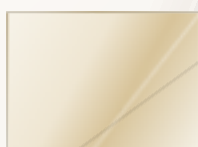

A working selection of the stones most often specified. Natural material varies block to block — these are representations, and every commission is confirmed against physical samples cut from the block reserved for your project. Stones outside this chart are sourced to order.

VEIN MATCHING

Book-matched and vein-continuous layouts available where the design runs across multiple panels.

FINISH SAMPLES

Any stone can be supplied polished, honed, brushed or tumbled — the same colour reads differently in each.

BESPOKE SOURCING

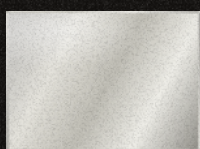

Matching to a stone already installed on site: send a sample or a photograph with a colour reference.

Hand-poured glass & metal leaf

Colour runs through the full body of the glass, so cut edges hold their tone. Gold, white-gold and copper leaf are sealed between glass layers — which is why they can be used in showers, hammams and submerged pool work without dulling.

BESPOKE COLOUR

Glass poured to a colour reference — a fabric, a paint code or a metal finish — for projects above the bespoke-pour minimum.

GRADIENTS

Tonal families of five to nine steps are made up per commission so a sky, a sea or a skin tone reads continuously.

MIXED SETTING

Glass (4 mm) is set flush with stone (5 mm) in the same field; the 1 mm difference is taken up in the bedding, so the finished surface is level.

Product data.

Written for the specifier's file. Figures followed by a small ring are the atelier's to confirm against the current technical sheet; everything else is fixed.

ITEM	SPECIFICATION
Stone tesserae	Natural marble, onyx, travertine and granite, selected for vein before cutting. Thickness 5 mm
Quartz tesserae	Engineered quartz, consistent colour across batches. Thickness 5 mm
Glass tesserae	Hand-poured glass, colour through the full body so cut edges hold their tone. Thickness 4 mm
Metal-leaf glass	24k gold, white gold and copper leaf sealed between glass layers — stable in showers, hammams and submerged work
Tessera sizes	Micro-cut from 5 × 5 mm; standard 10, 15 and 20 mm; large-format above 20 mm; free-form hand-cut shapes within the same artwork
Cutting	Hand-nipped, precision water-jet, or the two combined — water-jet outline with a hand-cut field
Finishes	Stone: polished, honed, brushed, tumbled, sand-blasted. Glass: gloss, satin, iridescent, mirror
Backing	Mesh backing as standard on every sheet and panel, so the work is fixed like tile and no loose tesserae are handled on site
Sheet & panel size	Standard sheet 300 × 300 mm °; artwork panels cut to the project drawing and numbered, maximum single panel <u>on enquiry</u> °
Joint width	<u>1–2 mm</u> ° nominal, adjustable to the design and the tessera scale
Weight	Approximately 13–15 kg/m ² in 5 mm stone and 10–11 kg/m ² in 4 mm glass, before adhesive
Tolerance	Panel outline <u>±1 mm</u> °; panels are dry-assembled and checked against the cutting drawing before dispatch
Colour variation	Natural stone varies block to block; a commission is cut from reserved material and confirmed against a physical lay-up. Glass is matched by pour batch
Technical constants	Density, water absorption and fire classification are stone- and glass-dependent — issued per specification <u>on enquiry</u> °
Spares	Loose tesserae from the same batch supplied with every commission, and the batch recorded against the project

Installation, site & care.

Mesh-backed panels are fixed by any competent tiling contractor. These are the conditions the work needs from the site.

ITEM	REQUIREMENT
Substrate	Render, screed, cement board or concrete — dry, cured, structurally sound and flat within 3 mm over 2 m °, primed per the adhesive manufacturer
Waterproofing	In showers, hammams, fountains and pools, a compliant tanking system applied and tested before any mosaic is fixed
Adhesive	White cement-based adhesive, class <u>C2TE S1 °</u> ; epoxy <u>R2T °</u> for submerged and heavy wet areas. White is essential beneath translucent glass and pale stone
Fixing	Full bed, back-buttered on larger panels, mesh pressed fully into the adhesive. Panels are fixed in the sequence given by the installation key
Grout	Cement-based or epoxy, colour to approval; epoxy in all wet and submerged work. Metal-leaf glass grouted without abrasive additives
Movement joints	To the project's own layout, carried through the mosaic; perimeter and structural joints kept clear and never bridged
Curing	Full adhesive cure before grouting, and before filling pools or fountains — allow <u>14–28 days °</u> depending on system and conditions
Site conditions	Fix between <u>+5 °C and +30 °C °</u> , protected from direct sun and draught while curing
Floors	Residential and light-commercial floors; slip classification depends on finish and tessera size and is issued on <u>enquiry °</u>
Exterior	Frost-resistant stone and glass specified per location; freeze–thaw exposure confirmed per project <u>on enquiry °</u>
Protection	Covered and protected from following trades until hand-over; final clean by the installing team
Sealing	Penetrating sealer on porous stone after grouting; re-seal every <u>12–24 months °</u> in wet or heavy-traffic areas
Cleaning	pH-neutral products only. No acids on marble, limestone or travertine; no abrasive pads or powders on glass or metal leaf
Documentation	Cutting drawing, numbered installation key, material schedule and maintenance sheet issued with every delivery

Seven stages, one team, no hand-offs.

01

Brief

Drawings, dimensions, references and the feeling you are after. A site visit or a video walk-through where possible.

02

Design

The studio develops the composition and returns a scaled visual set in your space, with alternatives on palette and tessera scale.

03

Material lay-up

The actual stones and glass are cut and laid up physically, photographed and sent — or presented in person — for sign-off.

04

Cutting drawing

Setting-out lines, panel divisions and a numbered key are issued, coordinated with the site programme.

05

Atelier production

Cutting and setting by hand at the bench, photographed at agreed stages so the client sees the work as it grows.

06

Delivery

Crated by panel sequence with the installation key, material schedule and spare tesserae from the same batch.

07

Installation

Fitted by our own team, or by your contractor with our drawings and remote supervision. Final clean, seal and hand-over.

KEPT THROUGHOUT

One contact, one drawing set, one record

Every approval, revision and batch is recorded against the commission — so a repair or an extension years later is matched to the original material.

Work in progress — the part most clients never get to see.

Commissions are photographed at the bench as they grow. It is also how a client approves a change while changing it is still easy.

FULL-PAGE PORTRAIT CROP - MIN 3000 PX ON THE LONG EDGE

INSTALLED

In place, lit, and living with the room.

A mosaic is finished only once it is on the wall or the floor it was drawn for. Panels arrive numbered and mesh-backed; fitting is carried out by our team, or by your contractor working to our drawings with supervision from the studio.

Where trade partners put this work.

Hospitality

Lobby floor medallions, reception features, spa and hammam linings, signature walls in restaurants and bars. Custom work that photographs — and that a guest remembers the property by.

Private residential

Entrance halls, stair risers, bathroom and shower walls, kitchen splashbacks, house monograms, pool floors and courtyard fountains.

Retail & hospitality interiors

Shopfront thresholds, brand motifs rendered in stone rather than vinyl, feature niches and display plinths built to the fit-out programme.

Places of significance

Commemorative panels, calligraphic and geometric compositions, restoration and extension of existing mosaic where the original material must be matched.

Built for the way studios actually work.

SUPPORT

- ◇ Named contact for the whole commission — design through hand-over
- ◇ Concept visuals for your client presentation, in your drawings
- ◇ Physical sample boards and material lay-ups for client meetings
- ◇ Specification text, technical data and maintenance sheets for your file
- ◇ Site measurement and installation supervision (*by arrangement*)

COMMERCIAL

- ◇ Trade pricing for architects, interior designers and contractors
- ◇ Fixed quotation against an approved drawing — no open-ended extras
- ◇ Staged payment aligned to design, production and delivery
- ◇ Spare tesserae from the same batch supplied with every commission

Send the drawing. We will send back the mosaic it was waiting for.

PROGRAMME

Design & approval	<u>2–3 weeks °</u>
Production, standard	<u>from 4 weeks °</u>
Large or complex artwork	<u>on programme °</u>
Sample board dispatch	<u>5–7 days °</u>
Minimum order	<u>on enquiry °</u>

DELIVERY & PROTECTION

Timber-crated by panel sequence, edge-protected and moisture-wrapped, with the installation key fixed inside the crate. Worldwide freight arranged, with export documentation handled by the atelier.

ASSURANCE

Materials and workmanship warranted for a period to confirm ° from delivery. Replacement tesserae remain available against the commission record for future repair.

The eight questions that come up first.

Can you match a stone already on site?

Send a sample or a photograph with a colour reference. We cut a comparison lay-up and you approve the match before anything is committed.

How long does a commission take?

Design and approval 2–3 weeks °, production from 4 weeks °, with the programme fixed against your site dates before production starts.

Can you work from my client's photograph?

Yes — a photograph, a painting, a fabric, a wallpaper, a logo or a sketch on paper. The studio redraws it as a cutting design, at the scale the wall needs.

Do you install, or do we?

Either. Our team fits the work, or your contractor does it to our drawings with supervision from the studio.

Will it arrive as loose tiles?

No. Everything is mesh-backed and numbered, so your contractor fixes panels in sequence rather than assembling an artwork on site.

Can the client see it before it is made?

Always. A scaled visual in the room, then the actual stone and glass laid up physically. Nothing is cut before both are signed off.

Can it go in a shower, hammam or pool?

Yes, with epoxy bedding and grout over a compliant waterproofing system. Gold and white-gold leaf sit between glass layers, so submersion does not dull them.

What if a piece is damaged years later?

Spare tesserae from the same batch ship with every commission, and the material record is kept against the project so a repair or an extension matches.

?

Not answered here

Send the drawing and the question together. You will get a proposal — a visual, a material selection and a fixed price against that drawing — rather than another brochure.

Send us a drawing and a reference.
We will do the rest.

O1

Enquire

Dimensions, location and any reference you already have. A rough sketch is enough to start.

O2

Receive a proposal

Concept visual, material selection and a fixed quotation against a drawing — typically within two weeks °.

O3

Approve and produce

Sign off the lay-up and the cutting drawing; production begins, with progress photographs at each stage.

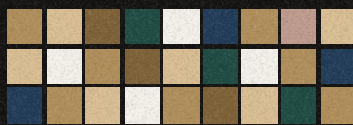

WHAT HELPS US QUOTE QUICKLY

- ◇ Finished dimensions, or a plan and elevation at any scale
- ◇ The surface it will sit on, and whether it is wet, submerged or exterior
- ◇ Reference images — anything from a photograph to a colour swatch
- ◇ Site programme: when the mosaic is needed on site
- ◇ Whether you want our team to install, or drawings for your contractor

CLOSING PHOTOGRAPH

*A quiet, elegant shot — a sample board,
a hand holding tesserae, or the studio*

3:4 PORTRAIT · MIN 2400 PX

Bespoke mosaic, *made only once*

MATERIALS

Marble, natural stone and quartz at 5 mm; hand-poured and metal-leaf glass at 4 mm.

MADE TO ORDER

Every commission drawn, cut and set for one address.
Nothing is stock.

DELIVERED

Mesh-backed, numbered and crated, with drawings and installation key.
