Bespoke Mosaic *in Marble & Glass*

A commission studio for architects, designers and developers —
where a drawing, a photograph or a single colour reference
becomes hand-cut stone and hand-poured glass, made to the exact
dimensions of your space.

FREE WORLDWIDE SHIPPING · HANDCRAFTED TO ORDER IN NATURAL MARBLE & GLASS · LIFETIME WARRANTY

TRADE & SPECIFICATION PORTFOLIO · CUSTOMISATION, MATERIALS, TECHNICAL DATA

Our atelier has expanded — and with it, what we can make for you.

Three capabilities are now open to trade partners, and every one of them exists for a single reason: to remove the limits on what a client can ask for.

For years the constraint in mosaic work has not been skill — it has been scale, palette and time. A design had to be simplified to fit the stock, the panel sizes had to suit the workshop rather than the wall, and a bespoke colour meant a season of waiting.

We have rebuilt the studio around the opposite premise. The design desk, the stone saws, the glass and the fitting team now sit inside one process, so a commission moves from reference image to installed surface without ever being handed to a third party — and without being edited down to what was convenient to produce.

*The question is no longer what we can supply.
It is what you would like made.*

I

Marble and glass, fused in one composition

Hand-cut stone and hand-poured glass, including 24k gold-leaf tesserae, set in the same artwork — stone for depth and vein, glass for light and saturation.

II

Customisation without a catalogue

No fixed range to choose from. You supply artwork, a mood, a material sample or a photograph; we return a cutting drawing and a physical colour lay-up for approval.

III

Made to the millimetre of your drawing

Panels are set out to your site dimensions, numbered, and delivered with an installation key — so what leaves the atelier fits the wall it was measured for.

Everything is decided by hand,
then held to a drawing.

ATELIER PHOTOGRAPH

*Hands at the bench — cutting, nipping
or setting tesserae*

3:4 PORTRAIT · MIN 2400 PX

MACRO PHOTOGRAPH

*Close detail where marble meets glass
and gold leaf*

3:4 PORTRAIT · MIN 2400 PX

STONE

Blocks are selected for vein direction before a single cut is made, so a figure runs through the finished composition rather than across it. Tesserae are split and dressed by hand — the edge you see is a cut edge, not a moulded one.

GLASS

Hand-poured glass carries colour through its full body, so a chipped or cut face reveals the same tone. Gold and white-gold leaf are laid between glass layers, which is why the metal keeps its lustre in wet areas.

SETTING

The flow of the setting lines — the *andamento* — is drawn before assembly. It is the difference between a picture made of tiles and a mosaic that moves with the light in the room.

If you can imagine it, we can *hand-cut it in stone.*

Nothing is chosen from a catalogue. Master artisans and in-house interior designers turn a reference into a one-of-a-kind marble and glass mosaic, tailored to the space down to the last tessera — and you see a free rendering of exactly how it will look before a single piece is cut.

CUSTOMISATION PHOTOGRAPH

*One striking bespoke piece — a monogram, a portrait,
a client's own pattern realised in stone and glass*

FULL-PAGE PORTRAIT CROP : MIN 3000 PX

01

SIZE

Cut to your drawing rather than to a standard format: a floor medallion, a full wall, a stair riser, a splashback, a pool floor, a table top, a framed panel. Irregular outlines and curved edges included.

02

COLOUR

Forty-two natural marbles and six engineered stones in the charts overleaf, with the full glass and metal-leaf range — or matched to a fabric, a paint reference, or a stone already on site.

03

DESIGN

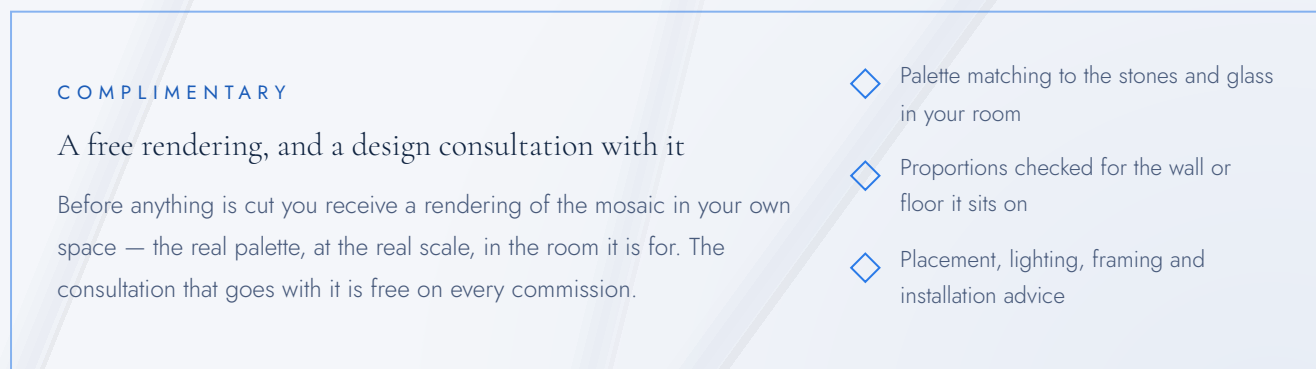

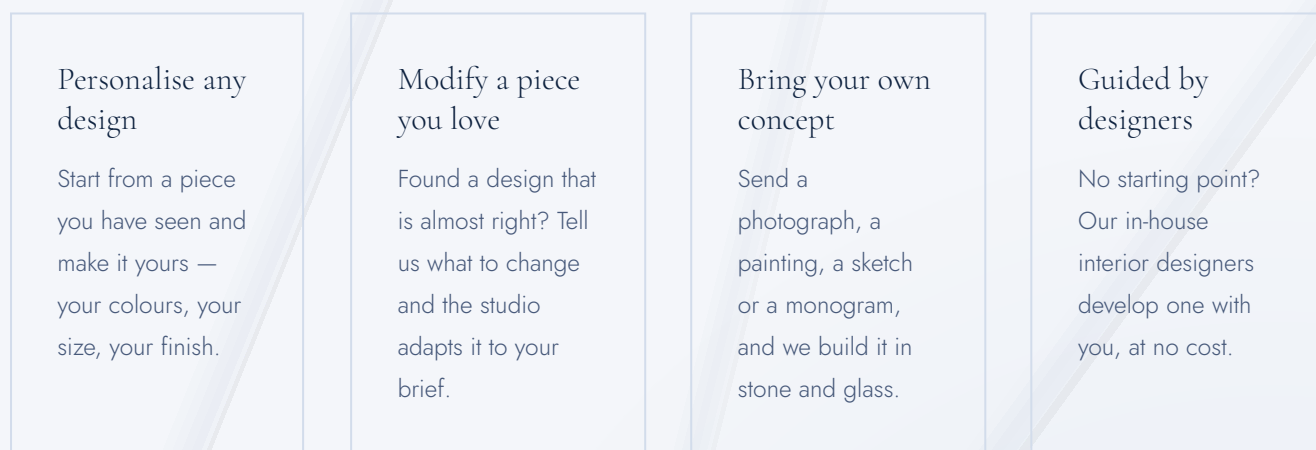

Your artwork, a photograph, a house monogram, a historical pattern, a brand motif — or an original composition developed in the studio to your brief.

Customise anything, down to the detail.

A commission can start anywhere — with a design you have seen, one you want changed, an image of your own, or nothing at all — and ends as a numbered set of panels that exist nowhere else.

FOUR WAYS IN

What you specify, and what we decide together.

Every line below is open on every commission. Where a project brief is silent, the atelier proposes — and nothing is cut before the drawing and the physical lay-up are signed off.

VARIABLE	AVAILABLE RANGE	DECIDED BY
Design origin	Client artwork, photograph, fabric or wallpaper reference, historical pattern, architect's drawing, or an original design developed in the studio	Client / studio
Composition style	Figurative, portrait, botanical, geometric, arabesque, <i>opus</i> patterns, gradient field, plain stone-on-stone	Client / studio
Tessera size	Micro-cut from 5 mm, standard 10 / 15 / 20 mm, large-format above 20 mm, and free-form hand-cut shapes within one piece	Studio, to viewing distance
Cut style	Hand-nipped irregular, precision water-jet, or the two combined — water-jet for the outline, hand-cut for the field	Studio
Surface finish	Polished, honed, brushed, tumbled, sand-blasted; gloss, satin or iridescent glass	Client
Grout	Colour-matched or deliberately contrasting; epoxy for wet and submerged areas	Client / studio
Format & size	Cut to your dimensions — medallions, borders, full walls, floors, stair risers, pool and hammam linings, table tops, framed panels	Client's drawing
Edge treatment	Straight cut, irregular outline, contrasting stone border, or metal trim	Client

APPROVAL SET

Before production you receive a free rendering of the design in situ, a cutting drawing with panel divisions and setting-out lines, a physical lay-up of the exact stones and glass, and a written specification with quantities and programme.

OFFERED BY REQUEST

Polished finish

A hand-applied seal that deepens the colour of the stone and lends a refined, museum-grade sheen.

Handcrafted frame

Bespoke framing made for the piece it surrounds, priced individually — the studio guides the options.

Old Roman technique

Hand-laid in the ancient Roman method with irregular natural tesserae, for an authentic, timeworn character.

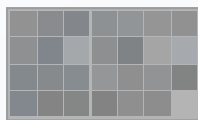

Natural marble — forty-two stones.

Every mosaic is hand-cut from this palette. Choose a single tone, or combine several into a composition that exists only in your project. Stones outside the chart are sourced to order, and natural material varies block to block — a commission is always confirmed against physical samples.

Engineered stone & hand-poured glass.

Engineered stone brings saturated, repeatable colour that natural stone cannot hold. Glass brings light: colour runs through the full body, so cut edges keep their tone, and gold, white-gold and copper leaf are sealed between layers for wet and submerged work.

Product data.

Written for the specifier's file. Figures followed by a small ring are the atelier's to confirm; everything else is fixed.

ITEM	SPECIFICATION
Natural stone	Marble, onyx, travertine and granite, selected for vein before cutting. Thickness 5 mm
Hand-poured glass	Full-body colour, so cut edges hold their tone. Thickness 4 mm . Metal-leaf glass with 24k gold, white gold or copper sealed between layers
Engineered quartz	Natural quartz aggregate bound with MDI resin for mechanical strength and moisture resistance. Dense, non-porous, wear-resistant. Thickness 8 mm
Manufacture	100% handmade — every tessera hand-cut and assembled by artisans, never machine-pressed or printed
Tessera sizes	Stone typically 5, 7 and 10 mm; glass 10 × 10, 15 × 15 and 20 × 20 mm; free-form hand-cut shapes within the same artwork on commission
Sheet size	300 × 300 mm (12 × 12 in); artwork panels cut to the project drawing and numbered, maximum single panel on enquiry °
Joint (grout line)	Approximately 1 mm , adjustable to the design and the tessera scale
Backing	Fibreglass netted mesh on every sheet and panel, so the work is fixed like tile and no loose tesserae are handled on site
Weight	Approximately 10 kg/m ² in 4 mm glass and 13–15 kg/m ² in 5 mm stone, before adhesive
Finishes	Stone: polished (gloss) or honed (smooth matte); brushed and tumbled on request ° . Glass: gloss, satin, iridescent, mirror
Tolerance	Panel outline ±1 mm ° ; panels dry-assembled and checked against the cutting drawing before dispatch
Applications	Walls and floors, interior and exterior, including wet areas such as showers and pools, when correctly installed, grouted and sealed
Colour variation	Natural stone varies block to block; a commission is cut from reserved material and confirmed against a physical lay-up. Glass is matched by pour batch
Spares	Loose tesserae from the same batch supplied with every commission, and the batch recorded against the project

Performance — hand-poured glass.

Zero water absorption is what puts this glass under water and outdoors: in a pool, a hammam or a sunlit courtyard it neither takes up water nor loses its colour.

TEST	RESULT	STANDARD
Water absorption	None	UNI EN ISO 10545-3 / ASTM C373
Chemical resistance	Resistant	UNI EN ISO 10545-13
Thermal shock resistance	Resistant	UNI EN ISO 10545-9 / ASTM C484
Frost resistance	Resistant	ASTM
Colour resistance to fading	Resistant	UNI EN ISO 10545-12 / DIN 51094
Bond strength	Passes	ASTM C482
Crazing resistance	Passes	ASTM C424

UNDER WATER

No absorption and no crazing: the same glass is specified for pool floors, fountains and hammam linings, with the metal leaf sealed between layers.

IN SUNLIGHT

Colour is in the body of the glass, not on its surface, so an exterior composition holds its tone rather than bleaching over seasons.

A NOTE ON HAND-MADE WORK

Because every tessera is hand-cut, these values are indicative and based on recognised international standards rather than batch certificates.

Installation & site.

Mesh-backed panels are fixed by any competent tiling contractor. These are the conditions the work needs from the site.

ITEM	REQUIREMENT
Substrate	Required. Clean, flat and structurally sound; dry and free of contaminants before any mosaic is fixed
Waterproofing	Required in showers, hammams, fountains and pools: a compliant tanking system, applied and tested first
Adhesive	Epoxy adhesive recommended, and required for wet, outdoor and submerged areas. White adhesive is essential beneath translucent glass and pale stone
Fixing	Full bed, back-buttered on larger panels, mesh pressed fully into the adhesive. Floating method where a design mixes materials of different thickness
Grout	Mandatory in wet and outdoor areas. Epoxy grout recommended throughout — non-porous and chemical-resistant
Movement joints	Mandatory. Carried through the mosaic to the project's own layout, with silicone at every change of plane
Slip resistance	DCOF ≥ 0.42 interior wet and ≥ 0.60 exterior, to local code. Honed (R11) rather than polished (R10) where a floor gets wet
Sealing	Required on marble , particularly in wet and exterior areas, after grouting
Curing	Full adhesive cure before grouting, and before filling pools or fountains — allow <u>14–28 days</u> ° depending on system and conditions
Site conditions	A controlled environment: avoid extreme temperatures during fixing and curing, and protect from direct sun and draught
Protection	Covered and protected from following trades until hand-over; final clean by the installing team
Documentation	Cutting drawing, numbered installation key, material schedule and maintenance sheet issued with every delivery

Care & maintenance.

One page to hand to the client or the facilities team. Followed, it keeps a mosaic looking the way it did on the day it was signed off.

RECOMMENDED

Regular cleaning

pH-neutral stone or glass cleaners, and nothing stronger for routine work.

Annual protection

A two-in-one colour enhancer and sealer applied once a year on natural stone.

Immediate spill clean-up

Wipe spills promptly — most staining on stone is a spill that was left.

AVOID

Acidic cleaners

They etch and damage natural stone surfaces, and the damage is permanent.

Abrasive products

Pads and powders scratch polished finishes and dull the shine, and they will mark metal leaf.

Harsh chemicals

Bleach and ammonia discolour grout and surfaces alike.

ON HAND-OVER

Final clean and the first seal are carried out by the installing team, and the maintenance sheet is handed over with the panel key.

ONCE A YEAR

Re-apply the two-in-one colour enhancer and sealer on natural stone — more often in a shower, a pool surround or an exterior courtyard.

BEFORE ANY REPAIR

Quote the commission reference. The material record tells us which stones and which pour batch to match, decades after delivery.

ASSURANCE

Lifetime warranty, and spares kept against the record

Every commission carries a lifetime warranty on materials and workmanship. Loose tesserae from the same batch ship with the order, and the batch stays recorded against the project — so a repair or an extension years later matches the original.

Seven stages, one team, no hand-offs.

01

Brief

Drawings, dimensions, references and the feeling you are after. A site visit or a video walk-through where possible.

02

Design & free rendering

The studio develops the composition and returns a rendering of the mosaic in your own space at no cost, with alternatives on palette and tessera scale.

03

Material lay-up

The actual stones and glass are cut and laid up physically, photographed and sent — or presented in person — for sign-off.

04

Cutting drawing

Setting-out lines, panel divisions and a numbered key are issued, coordinated with the site programme.

05

Atelier production

Cutting and setting by hand at the bench, photographed at agreed stages so the client sees the work as it grows.

06

Delivery

Crated by panel sequence with the installation key, material schedule and spare tesserae from the same batch.

07

Installation

Fitted by our own team, or by your contractor with our drawings and remote supervision. Final clean, seal and hand-over.

KEPT THROUGHOUT

One contact, one drawing set, one record

Every approval, revision and batch is recorded against the commission — so a repair or an extension years later is matched to the original material.

Work in progress — the part most clients never get to see.

Commissions are photographed at the bench as they grow. It is also how a client approves a change while changing it is still easy.

INSTALLED

In place, lit, and living with the room.

A mosaic is finished only once it is on the wall or the floor it was drawn for. Panels arrive numbered and mesh-backed; fitting is carried out by our team, or by your contractor working to our drawings with supervision from the studio.

Where trade partners put this work.

Hospitality

Lobby floor medallions, reception features, spa and hammam linings, signature walls in restaurants and bars. Custom work that photographs — and that a guest remembers the property by.

Private residential

Entrance halls, stair risers, bathroom and shower walls, kitchen splashbacks, house monograms, pool floors and courtyard fountains.

Retail & hospitality interiors

Shopfront thresholds, brand motifs rendered in stone rather than vinyl, feature niches and display plinths built to the fit-out programme.

Places of significance

Commemorative panels, calligraphic and geometric compositions, restoration and extension of existing mosaic where the original material must be matched.

SUPPORT

- ◇ Named contact for the whole commission — design through hand-over
- ◇ Free rendering of the mosaic in your space, for your client presentation
- ◇ Complimentary design consultation with our in-house interior designers
- ◇ Physical sample boards and material lay-ups for client meetings
- ◇ Specification text, technical data and maintenance sheets for your file
- ◇ Site measurement and installation supervision (*by arrangement*)

COMMERCIAL

- ◇ Trade pricing for architects, interior designers and contractors
- ◇ Fixed quotation against an approved drawing — no open-ended extras
- ◇ Staged payment aligned to design, production and delivery
- ◇ Spare tesserae from the same batch supplied with every commission
- ◇ Free worldwide shipping, and a lifetime warranty on every piece

Send the drawing. We will send back the mosaic it was waiting for.

PROGRAMME

Design & approval	<u>2–3 weeks °</u>
Production, standard	<u>from 4 weeks °</u>
Large or complex artwork	<u>on programme °</u>
Sample board dispatch	<u>5–7 days °</u>
Minimum order	<u>on enquiry °</u>

DELIVERY

Free shipping worldwide. Timber-crated by panel sequence, edge-protected and moisture-wrapped, with the installation key fixed inside the crate and export documentation handled by the atelier.

ASSURANCE

Lifetime warranty on materials and workmanship. Replacement tesserae from the original batch remain available against the commission record for future repair.

The eight questions that come up first.

Can you match a stone already on site?

Send a sample or a photograph with a colour reference. We cut a comparison lay-up and you approve the match before anything is committed.

How long does a commission take?

Design and approval 2–3 weeks, production from 4 weeks with the programme fixed against your site dates before production starts.

Can you work from my client's photograph?

Yes — a photograph, a painting, a fabric, a wallpaper, a logo or a sketch on paper. The studio redraws it as a cutting design, at the scale the wall needs.

Do you install, and do you ship to us?

Either — our team fits the work, or your contractor does it to our drawings with supervision from the studio. Shipping is free worldwide, crated and documented by the atelier.

Will it arrive as loose tiles?

No. Everything is mesh-backed and numbered, so your contractor fixes panels in sequence rather than assembling an artwork on site.

Can the client see it before it is made?

Always, and the rendering is free. You see the mosaic in the room first, then the actual stone and glass laid up physically. Nothing is cut before both are signed off.

Can it go in a shower, hammam or pool?

Yes, with epoxy bedding and grout over a compliant waterproofing system. Gold and white-gold leaf sit between glass layers, so submersion does not dull them.

What if a piece is damaged years later?

Every commission carries a lifetime warranty. Spare tesserae from the same batch ship with the order and the material record is kept, so a repair or an extension matches the original.

?

Not answered here

Send the drawing and the question together. You will get a proposal — a visual, a material selection and a fixed price against that drawing — rather than another brochure.

Send us a drawing and a reference.
We will do the rest.

O1

Enquire

Dimensions, location and any reference you already have. A rough sketch is enough to start.

O2

Receive a proposal

Concept visual, material selection and a fixed quotation against a drawing — typically within two weeks °.

O3

Approve and produce

Sign off the lay-up and the cutting drawing; production begins, with progress photographs at each stage.

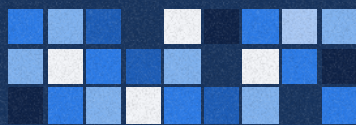

WHAT HELPS US QUOTE QUICKLY

- ◇ Finished dimensions, or a plan and elevation at any scale
- ◇ The surface it will sit on, and whether it is wet, submerged or exterior
- ◇ Reference images — anything from a photograph to a colour swatch
- ◇ Site programme: when the mosaic is needed on site
- ◇ Whether you want our team to install, or drawings for your contractor

CLOSING PHOTOGRAPH

*A quiet, elegant shot — a sample board,
a hand holding tesserae, or the studio*

3:4 PORTRAIT · MIN 2400 PX

Bespoke mosaic, *made only once*

HANDCRAFTED TO ORDER

Natural marble at 5 mm and hand-poured glass at 4 mm, drawn, cut and set for one address. Nothing is stock.

FREE WORLDWIDE SHIPPING

Mesh-backed, numbered and crated by panel sequence, with drawings and installation key — delivered anywhere.

LIFETIME WARRANTY

On materials and workmanship, with spares from the original batch kept against the commission record.
