

Handcrafted  
Natural Marble &  
Glass Mosaics for  
*Luxury Interiors*  
& *Exteriors.*

---

# Where timeless craft meets *precision.*

Every commission is drawn, cut and set under one roof — from the reference image a client sends us to the numbered panels that arrive on site, ready to fix.

HAND-CUT STONE

Worldwide

FREE SHIPPING

Everything is decided by hand,  
then held to a drawing.

THE DETAIL

*Thousands of tesserae, placed by hand.*

STONE

Blocks are selected for vein direction before a single cut is made, so a figure runs through the finished composition rather than across it. Tesserae are split and dressed by hand — the edge you see is a cut edge, not a moulded one.

GLASS

Hand-poured glass carries colour through its full body, so a chipped or cut face reveals the same tone. Gold and white-gold leaf are laid between glass layers, which is why the metal keeps its lustre in wet areas.

SETTING

The flow of the setting lines — the *andamento* — is drawn before assembly. It is the difference between a picture made of tiles and a mosaic that moves with the light in the room.

## WHAT WE MAKE

# Three ways to hold a design in stone.

Every commission is hand-cut and mesh-backed as standard. Beyond that, two treatments change the character of the finished piece entirely — and either can be framed.

## Hand-cut mosaic

The standard commission: tesserae cut and set by hand from 5 mm stone and 4 mm glass, delivered mesh-backed and numbered. Any subject, any dimension, any palette from the charts.

## Roman technique, polished

Hand-laid in the ancient Roman method with irregular natural tesserae, then finished with a hand-applied polish that deepens the colour of the stone — an authentic, timeworn character with a museum-grade sheen.

## Framed

A handcrafted frame made for the piece it surrounds, priced individually. Turns a mosaic into a hung artwork rather than a fixed surface — and makes it something a client can take with them.

## CUSTOMISATION

# If you can imagine it, we can *hand-cut it in stone.*

Nothing is chosen from a catalogue. Master artisans and in-house interior designers turn a reference into a one-of-a-kind marble and glass mosaic, tailored to the space down to the last tessera — and you see a free rendering of exactly how it will look before a single piece is cut.

## CUSTOMISATION PHOTOGRAPH

*A figurative commission — a portrait, an animal,  
a client's own subject realised in stone and glass*

UPLOAD AS IMAGES/CUSTOM-HERO.JPG · PORTRAIT · MIN 2000 PX

## 01

### SIZE

---

Cut to your drawing rather than to a standard format: a floor medallion, a full wall, a stair riser, a splashback, a pool floor, a table top, a framed panel. Irregular outlines and curved edges included.

## 02

### COLOUR

---

Forty-two natural marbles and six engineered stones in the charts overleaf, with the full glass and metal-leaf range — or matched to a fabric, a paint reference, or a stone already on site.

## 03

### DESIGN

---

Your artwork, a photograph, a house monogram, a historical pattern, a brand motif — or an original composition developed in the studio to your brief.

# What you specify, and what we decide together.

A commission can start anywhere — with a design you have seen, one you want changed, an image of your own, or nothing at all. Every line below is open on every commission, and nothing is cut before the free rendering and the physical lay-up are signed off. The polished finish, the Roman technique and framing are shown on page 4.

FOUR WAYS IN

|                                                                                                                                 |                                                                                                                                           |                                                                                                                                 |                                                                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <p>Personalise any design</p> <p>Start from a piece you have seen and make it yours — your colours, your size, your finish.</p> | <p>Modify a piece you love</p> <p>Found a design that is almost right? Our in-house interior designers develop one with you, at no cost.</p> |
|---------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|

| VARIABLE          | AVAILABLE RANGE                                                                                                                                   | DECIDED BY                  |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| Design origin     | Client artwork, photograph, fabric or wallpaper reference, historical pattern, architect's drawing, or an original design developed in the studio | Client / studio             |
| Composition style | Figurative, portrait, botanical, geometric, arabesque, <i>opus</i> patterns, gradient field, plain stone-on-stone                                 | Client / studio             |
| Tessera size      | Micro-cut from 5 mm, standard 10 / 15 / 20 mm, large-format above 20 mm, and free-form hand-cut shapes within one piece                           | Studio, to viewing distance |
| Cut style         | Hand-nipped irregular, precision water-jet, or the two combined — water-jet for the outline, hand-cut for the field                               | Studio                      |
| Surface finish    | Polished, honed, brushed, tumbled, sand-blasted; gloss, satin or iridescent glass                                                                 | Client                      |
| Grout             | Colour-matched or deliberately contrasting; epoxy for wet and submerged areas                                                                     | Client / studio             |
| Format & size     | Cut to your dimensions — medallions, borders, full walls, floors, stair risers, pool and hammam linings, table tops, framed panels                | Client's drawing            |
| Edge treatment    | Straight cut, irregular outline, contrasting stone border, or metal trim                                                                          | Client                      |

# In place, lit, and living with the room.

A mosaic is finished only once it is on the wall, the floor or the pool it was drawn for. Panels arrive numbered and mesh-backed; fitting is by our team, or by your contractor working to our drawings with supervision from the studio.

## PHOTOGRAPHED

Progress images at agreed stages, so the client watches the work grow rather than waiting in silence.

## APPROVED

Nothing is cut before the free rendering and the physical material lay-up are both signed off.

## RECORDED

Every stone and pour batch is logged against the commission, so a repair years later still matches.

# Twenty collections, and none of them a limit.

Close to two thousand designs are already drawn, and any one can be recut in your palette, at your dimensions. A starting point for the conversation — not a catalogue to order from.

ONE-OF-A-KIND

# Where trade partners put this work.

## Hospitality

Lobby floor medallions, reception features, spa and hammam linings, signature walls in restaurants and bars. Custom work that photographs — and that a guest remembers the property by.

## Private residential

Entrance halls, stair risers, bathroom and shower walls, kitchen splashbacks, house monograms, pool floors and courtyard fountains.

## Retail & hospitality interiors

Shopfront thresholds, brand motifs rendered in stone rather than vinyl, feature niches and display plinths built to the fit-out programme.

## Places of significance

Commemorative panels, calligraphic and geometric compositions, restoration and extension of existing mosaic where the original material must be matched.

# Natural marble — forty-two stones.

Every mosaic is hand-cut from this palette. Choose a single tone, or combine several into a composition that exists only in your project. Stones outside the chart are sourced to order, and natural material varies block to block — a commission is always confirmed against physical samples.

# Engineered stone & hand-poured glass.

Engineered stone brings saturated, repeatable colour that natural stone cannot hold. Glass brings light: colour runs through the full body, so cut edges keep their tone, and gold, white-gold and copper leaf are sealed between layers for wet and submerged work.

# Product data.

Written for the specifier's file. Figures followed by a small ring are the atelier's to confirm; everything else is fixed.

♦ *Every mosaic is weatherproof, waterproof, and suitable for both indoor and outdoor installations.* ♦

| ITEM               | SPECIFICATION                                                                                                                                                                                                                       |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Natural stone      | Marble, onyx, travertine and granite, selected for vein before cutting. Thickness <b>5 mm</b>                                                                                                                                       |
| Hand-poured glass  | Full-body colour, so cut edges hold their tone. Thickness <b>4 mm</b> . Metal-leaf glass with 24k gold, white gold or copper sealed between layers                                                                                  |
| Engineered quartz  | Natural quartz aggregate bound with MDI resin. Dense, non-porous and wear-resistant; Mohs 7, water absorption approximately 0.02% by volume; excellent resistance to acidic, alkaline and neutral substances. Thickness <b>8 mm</b> |
| Manufacture        | 100% handmade — every tessera hand-cut and assembled by artisans, never machine-pressed or printed                                                                                                                                  |
| Tessera sizes      | Stone typically 5, 7 and 10 mm; glass 10 × 10, 15 × 15 and 20 × 20 mm; free-form hand-cut shapes within the same artwork on commission                                                                                              |
| Sheet size         | <b>300 × 300 mm</b> (12 × 12 in); artwork panels cut to the project drawing and numbered, maximum single panel <a href="#">on enquiry °</a>                                                                                         |
| Joint (grout line) | Approximately <b>1 mm</b> , adjustable to the design and the tessera scale                                                                                                                                                          |
| Backing            | <b>Fibreglass netted mesh</b> on every sheet and panel, so the work is fixed like tile and no loose tesserae are handled on site                                                                                                    |
| Weight             | Approximately 10 kg/m <sup>2</sup> in 4 mm glass and 13–15 kg/m <sup>2</sup> in 5 mm stone, before adhesive                                                                                                                         |
| Finishes           | Stone: polished (gloss) or honed (smooth matte); brushed and tumbled <a href="#">on request °</a> . Glass: gloss, satin, iridescent, mirror                                                                                         |
| Tolerance          | Panel outline <a href="#">±1 mm °</a> ; panels dry-assembled and checked against the cutting drawing before dispatch                                                                                                                |
| Applications       | Walls and floors, interior and exterior, including wet areas such as showers and pools, when correctly installed, grouted and sealed                                                                                                |
| Colour variation   | Natural stone varies block to block; a commission is cut from reserved material and confirmed against a physical lay-up. Glass is matched by pour batch                                                                             |
| Spares             | Loose tesserae from the same batch supplied with every commission, and the batch recorded against the project                                                                                                                       |

# Material performance.

Tested values with the standard each figure is measured against. Because every tessera is hand-cut, these are indicative values based on recognised international standards rather than batch certificates.

## NATURAL MARBLE

| TEST                 | RESULT                                               | STANDARD          |

| Crazing resistance          | Passes    | ASTM C424                       |

# Installation, site & care.

Mesh-backed panels are fixed by any competent tiling contractor. These are the conditions the work needs from the site, and the regime that keeps it looking the way it did on hand-over.

| ITEM            | REQUIREMENT                                                                                                                                                |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Substrate       | <b>Required.</b> Clean, flat and structurally sound; dry and free of contaminants before any mosaic is fixed                                               |
| Waterproofing   | <b>Required</b> in showers, hammams, fountains and pools: a compliant tanking system, applied and tested first                                             |
| Adhesive        | Epoxy adhesive recommended, and <b>required</b> for wet, outdoor and submerged areas. White adhesive is essential beneath translucent glass and pale stone |
| Fixing          | Full bed, back-buttered on larger panels, mesh pressed fully into the adhesive. Floating method where a design mixes materials of different thickness      |
| Grout           | <b>Mandatory</b> in wet and outdoor areas. Epoxy grout recommended throughout — non-porous and chemical-resistant                                          |
| Movement joints | <b>Mandatory.</b> Carried through the mosaic to the project's own layout, with silicone at every change of plane                                           |
| Slip resistance | DCOF $\geq 0.42$ interior wet and $\geq 0.60$ exterior, to local code. Honed (R11) rather than polished (R10) where a floor gets wet                       |
| Sealing         | <b>Required on marble</b> , particularly in wet and exterior areas, after grouting                                                                         |
| Curing          | Full adhesive cure before grouting, and before filling pools or fountains — allow <u>14–28 days</u> ° depending on system and conditions                   |
| Site conditions | A controlled environment: avoid extreme temperatures during fixing and curing, and protect from direct sun and draught                                     |
| Protection      | Covered and protected from following trades until hand-over; final clean by the installing team                                                            |
| Documentation   | Cutting drawing, numbered installation key, material schedule and maintenance sheet issued with every delivery                                             |

## RECOMMENDED

pH-neutral stone or glass cleaners for routine work; a two-in-one colour enhancer and sealer once a year on natural stone; spills wiped promptly — most staining is a spill that was left.

## AVOID

Acidic cleaners, which etch natural stone permanently; abrasive pads and powders, which dull polished finishes and mark metal leaf; bleach and ammonia, which discolour grout and surfaces alike.

# Seven stages, one team, no hand-offs.

01

## Brief

Drawings, dimensions, references and the feeling you are after. A site visit or a video walk-through where possible.

02

## Design & free rendering

The studio develops the composition and returns a rendering of the mosaic in your own space at no cost, with alternatives on palette and tessera scale.

03

## Material lay-up

The actual stones and glass are cut and laid up physically, photographed and sent — or presented in person — for sign-off.

04

## Cutting drawing

Setting-out lines, panel divisions and a numbered key are issued, coordinated with the site programme.

05

## Atelier production

Cutting and setting by hand at the bench, photographed at agreed stages so the client sees the work as it grows.

06

## Delivery

Crated by panel sequence with the installation key, material schedule and spare tesserae from the same batch.

07

## Installation

Fitted by our own team, or by your contractor with our drawings and remote supervision. Final clean, seal and hand-over.

### KEPT THROUGHOUT

## One contact, one drawing set, one record

Every approval, revision and batch is recorded against the commission — so a repair or an extension years later is matched to the original material.

# Built for the way studios actually work.

## SUPPORT

- ◇ Named contact for the whole commission — design through hand-over
- ◇ Free rendering of the mosaic in your space, for your client presentation
- ◇ Complimentary design consultation with our in-house interior designers
- ◇ Physical sample boards and material lay-ups for client meetings
- ◇ Specification text, technical data and maintenance sheets for your file
- ◇ Site measurement and installation supervision (*by arrangement*)

## COMMERCIAL

- ◇ Trade pricing for architects, interior designers and contractors
- ◇ Fixed quotation against an approved drawing — no open-ended extras
- ◇ Staged payment aligned to design, production and delivery
- ◇ Spare tesserae from the same batch supplied with every commission
- ◇ Free worldwide shipping, and a lifetime warranty on every piece

*Send the drawing. We will send back the mosaic it was waiting for.*

## PROGRAMME

|                          |                |
|--------------------------|----------------|
| Design & approval        | 2–3 weeks °    |
| Production, standard     | from 4 weeks ° |
| Large or complex artwork | on programme ° |
| Sample board dispatch    | 5–7 days °     |
| Minimum order            | on enquiry °   |

## DELIVERY

**Free shipping worldwide.** Timber-crated by panel sequence, edge-protected and moisture-wrapped, with the installation key fixed inside the crate and export documentation handled by the atelier.

## ASSURANCE

**Lifetime warranty** on materials and workmanship. Replacement tesserae from the original batch remain available against the commission record for future repair.

# The eight questions that come up first.

Can you match a stone already on site?

Send a sample or a photograph with a colour reference. We cut a comparison lay-up and you approve the match before anything is committed.

How long does a commission take?

Design and approval 2–3 weeks ◦, production from 4 weeks ◦, with the programme fixed against your site dates before production starts.

Can you work from my client's photograph?

Yes — a photograph, a painting, a fabric, a wallpaper, a logo or a sketch on paper. The studio redraws it as a cutting design, at the scale the wall needs.

Do you install, and do you ship to us?

Either — our team fits the work, or your contractor does it to our drawings with supervision from the studio. Shipping is free worldwide, crated and documented by the atelier.

Will it arrive as loose tiles?

No. Everything is mesh-backed and numbered, so your contractor fixes panels in sequence rather than assembling an artwork on site.

Can the client see it before it is made?

Always, and the rendering is free. You see the mosaic in the room first, then the actual stone and glass laid up physically. Nothing is cut before both are signed off.

Can it go in a shower, hammam or pool?

Yes, with epoxy bedding and grout over a compliant waterproofing system. Gold and white-gold leaf sit between glass layers, so submersion does not dull them.

What if a piece is damaged years later?

Every commission carries a lifetime warranty. Spare tesserae from the same batch ship with the order and the material record is kept, so a repair or an extension matches the original.

?

Not answered here

Send the drawing and the question together. You will get a proposal — a visual, a material selection and a fixed price against that drawing — rather than another brochure.

Send us a drawing and a reference.  
We will do the rest.

## O1

### Enquire

Dimensions, location and any reference you already have. A rough sketch is enough to start.

## O2

### Receive a proposal

Concept visual, material selection and a fixed quotation against a drawing — typically within two weeks °.

## O3

### Approve and produce

Sign off the lay-up and the cutting drawing; production begins, with progress photographs at each stage.

#### WHAT HELPS US QUOTE QUICKLY

- ◇ Finished dimensions, or a plan and elevation at any scale
- ◇ The surface it will sit on, and whether it is wet, submerged or exterior
- ◇ Reference images — anything from a photograph to a colour swatch
- ◇ Site programme: when the mosaic is needed on site
- ◇ Whether you want our team to install, or drawings for your contractor

#### CLOSING PHOTOGRAPH

*A quiet, elegant shot — a sample board,  
a hand holding tesserae, or the studio*

3:4 PORTRAIT · MIN 2400 PX

#### OUR PROMISE

### Premium craft

Handcrafted from the finest stone and glass, for lasting beauty.

### Satisfaction promise

Love it or return it — 100% satisfaction or your money back.

### Safe worldwide shipping

Carefully packed so the mosaic arrives in perfect condition.

### Easy, secure payment

Multiple payment options with a fast, secure checkout.

### Lifetime warranty

Every mosaic is backed for life, protecting the investment.

## Bespoke mosaic, *made only once*

---

### HANDCRAFTED TO ORDER

---

Natural marble at 5 mm and hand-poured glass at 4 mm, drawn, cut and set for one address. Nothing is stock.

### FREE WORLDWIDE SHIPPING

---

Mesh-backed, numbered and crated by panel sequence, with drawings and installation key — delivered anywhere.

### LIFETIME WARRANTY

---

On materials and workmanship, with spares from the original batch kept against the commission record.
